World Heritage in China Series No. 8: Zuojiang Huashan Rock Art Cultural Landscape	13 August 2019	30 April 2019

Stamp Sheetlet

World Heritage in China Series No. 8 by Hongkong Post showcases the rock art cultural landscape of Zuojiang Huashan. Included in the World Heritage List in 2016, these rock art sites are located on steep cliffs above the Guangxi Zuojiang River and Mingjiang River at Chongzuo in Guangxi Zhuang Autonomous Region. They are the works of the ancestors of the Zhuang ethnic minority, illustrating the lives of the Luoyue people and the ancient bronze drum culture. Featuring the rock art in close-up and on the sheer riverside cliff faces that stretch for miles, this stamp sheetlet gives the public a chance to admire this celebrated cultural heritage.
